Eco Christmas Gifts Collection 2022

Who we are

We are British designers, manufacturers, printers and finishers of a wide range of corporate and promotional merchandise specialising in sustainable materials. All stages of production are in house, backed by a multi award winning customer service team to help with your orders.

Sustainable British manufacturing

There is no standard definition of sustainable manufacturing. Sustainable British manufacturing for us is the safe production of our products through economically and environmentally sound processes, using ethically sourced materials with print and production techniques that minimise negative impacts while conserving natural resources and energy. Sustainable manufacturing also provides benefit to our employees and the wider community and ensures product safety for our customers.

Fancy something a little different?

As the actual manufacturers of everything you will see in this brochure, we can also make custom shapes and products to suit your requirements in any of these materials. Just let us have your ideas and we can convert them into your own unique products.

Our Sustainable Materials

Bamboo

Recycled Acrylic

Steel

Aluminium

Moso® Bamboo

All MOSO® material is made in production facilities that are ISO 9001 quality and ISO 14001 environmental third party certified and comply with the most stringent international standards. All adhesives used by MOSO® easily meet the very strict E1 class following the EN717 standard with respect to formaldehyde emissions and all MOSO®'s solid bamboo materials are proven and certified to be carbon neutral or better over their full life cycle. MOSO® bamboo is one of the quickest growing plants in the world and can grow up to 50 cm a day before reaching a height of twenty metres. After maturing over four to five years it's cut down, but amazingly the act of cutting down mature cane stimulates the plant to grow more canes. The result is the plant itself never needs to be dug up and so retains any carbon captured.

Steel

All our steel is part recycled material and the environmental benefits of steel include the fact that the material can be recycled with ease anywhere in the UK. Most manufacturers buy in their components, many from overseas, but we make all of ours at our factory from steel coils and sheets for the lowest possible carbon footprint. As with aluminium, our zero-waste component manufacturing allows for the sale of all excess steel from our factory for recycling, the sale of which is all spent on purchasing Gold Standard carbon offsets.* Scrap steel sales have formed a large part of us already achieving our 100 tonnes of carbon reduction target in 2022.

Recycled Acrylic

Our acrylic is produced from 100% recycled acrylic and is 100% recyclable at the end of its useful life. Unlike other techniques the production of recycled acrylic uses a proprietary process which allows for the recovery of the original solvent (MMA). This solvent is a durable, noble plastic which is reused to produce new acrylic sheets. The benefit of this process is that recycled clear transparent acrylic has the same quality as new virgin acrylic, but more importantly it can be recycled, countless times, without ever losing its all important properties. An additional positive is this process also reduces water consumption and carbon emissions at the point of manufacture while being VOC and HFC free.

Aluminium

All of the aluminium we use in our products has recycled content and it's one of the most sustainable materials on the market today. In addition, our zero-waste manufacturing processes allow for the collection of all unused 'offcuts' of aluminium for recycling as well. Recycling aluminium saves about 90% of the energy it takes to make new aluminium as well as helping to reduce the demand for mining the bauxite ore needed to produce new aluminium. The commercial and domestic infrastructure to recycle aluminium is continually growing and increased public awareness of it's sustainable credentials means it has become a very attractive and popular material choice.

* We have partnered with **Ecologi** to fund Gold Standard certified sustainability projects and tree planting schemes all over the world. Find out more and see the difference we are making at ecologi.com/sustainablebritishmanufacturing

Our Sustainable Materials

Oak

Cherry

Walnut

Maple

Oak

Oak is a classic European timber, instantly recognisable by its distinctive medullary rays seen within its grain. It has amazing strength and stunning honey colour, making it our most desirable and popular material. Oak has been grown as a managed crop tree for many hundreds of years as a highly sustainable resource in Europe. In fact, for many years more oak trees have been planted year on year than are being harvested. As a result, NatureServe, a non-profit organisation made up of biodiversity scientists, presented oak a conservation status of G5 SECURE. The oak we use for our gifts is grade A in quality which in principle means its free of defects on four sides. It is of Croatian origin and managed and approved under either FSC or PEFC certification schemes depending on the tree origin.

Cherry

A beautiful hardwood renowned for its varying rich red to reddish brown colouration which will generally darken over time from exposure to UV light. This premium wood has historically been used to manufacture high quality musical instruments and features naturally occurring pin knots and gum streaks which create the overall character of the wood. The cherry we use is sourced from the USA where it is grown as a crop plant for its fruit commercially. Over time, as the trees get older, they become less productive and are cut down, to be replaced with new trees to maintain fruit productivity. Due to the popularity of the fruit, growing cherry trees is increasing year on year and in doing so can be considered sustainable, and has been given the conservation status G5 SECURE by NatureServe.

Walnut

A stunning hardwood, light to dark chocolate brown colour with darker streaks and a close grain. Over time and exposure to UV light the dark colour lightens as it ages. Most commonly seen in high quality furniture production, walnut exudes an elegance in our products with its dark colour providing a particularly good background to vibrant and colourful printed art work. Our walnut is sourced from old crop trees that have been grown commercially for its produce in the USA. This material is carefully managed and cultivated to ensure that existing stock is always ample in ratio to what is being harvested, and it has also been given the conservation status G5 SECURE by NatureServe.

Maple

This hardwood has an amazing creamy white closed grain with a slight reddish-brown tinge throughout containing pith flecks which add to its natural character. It prints extremely well providing a stunning back drop to most artwork designs, however definition on laser engraving is less strong. It has been given the conservation status G5 SECURE by NatureServe, and we are also proud to say that our Maple supply is FSC certified as well.

For every solid wood ornament or gift we make we will pay for 1 tree to be planted. For every 50 items of merchandise we make from natural materials, any wood type or bamboo, we will also plant 1 tree. Merchandise includes any type of coaster, keyring, phone stand, Xmas decoration, flat pack character and so much more, there's lots for you to choose from. If you need less than 50 items no problem, you're still contributing to the forest as all order quantities are included.

Moso® Bamboo Xmas Tree Decorations

Moso® Bamboo Tree Decorations

The most eco friendly British made Xmas tree decorations available anywhere! 72mm diameter, loop hole fitting, supplied with natural twine. 10 unique Xmas themed designs with ample room for your personalisation and logo. Each design is also available in recycled acrylic (see p08).

Bamboo Flat Pack Gift Set
(Accessories Stand, Coaster & Keyring)

1

MIX & MATCH

Choose between solid oak, warm caramel Moso® bamboo, steel, aluminium or recycled acrylic. Choose the pieces you would like in each set, from flat pack Xmas decorations, tablet stands, phone stands, coasters, keyrings, characters, cards, ornaments and more!

2

PERSONALISE

Printed or engraved, personalising each product couldn't be easier! Simply decide on your logo and/or message and send it to us, along with a list of your recipients names. We will then artwork and proof these back to you for approval. Alternatively you can now visit addnames.co.uk and do it all online!

3

ECO PACK & POST

Each set is designed to fit snugly into our sturdy, plastic free flatpack postal packaging. Our packaging is natural and neutral and can be sent to a central hub or direct to any number of individual recipients addresses under plain cover.

Not quite right? You're in luck, we can also create bespoke products - just send us your ideas!
